REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Claims 1-12 are under examination. Out of them claims 1 and 12 are independent claims.

Claim 1 encompasses a method for producing moldings from finely divided materials and a heat-curable composition. The heat-curable composition comprises (A) a reaction product of (i) a specific polycarboxylic acid (or an anhydride) of (claimed) formula, (ii) ammonia and if desired, (iii) primary amines or compounds containing two or more hydroxyl groups and/or (B) a mixture of a polycarboxylic acid (above) (or its anhydride) and a substance which releases ammonia on heating.

Claim 12 encompasses only the above heat-curable composition.

Prior art includes only one reference, viz. Dotzauer et al (CA 2037214). Dotzauer discloses moldings containing finely divided materials and condensates of high molecular weight polycarboxylic acids and polyhydric alcohols, alkanolamines or polyamines. Appellants in their recent response have explained and proved that the patentee fails to teach the claimed polycarboxylic acids and ammonia or a substance that releases ammonia on heating.

Claims 1-12 are therefore deemed to be in condition for allowance.

Art Unit: 1711

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
